The Comfort Space 14 is the model of choice for forward thinking hire companies looking to provide a differentiated product to their customers to help win new business or secure the business already won. As well as the obvious advantages in the welfare hire market the Comfort Space 14 is the perfect choice for contractors wanting to offer an improved level of comfort to their employees.

Offering significantly more space and welfare facilities than the standard 6 man welfare unit used historically throughout the welfare hire industry. The Comfort Space 14 is the latest addition to the range and is evidence of Boss Cabins commitment to develop products that meet the ever changing requirements of the mobile welfare market.

Capable of providing welfare for 9 people in comfort with both dedicated under seat storage and individual personal storage compartments to prevent trip hazards through personal belongings being left on the floor as seen in the standard 6 man units supplied by other manufacturers.

Comfort Space 14 — Why follow the pack when you can lead.

Key Benefits:

- Easily towed by most small commercial vehicles (Van / Pick-up)
- Reduced transport costs
- No need for lifting plans or movements orders as with static welfare units
- Able to access sites with height and width restrictions.
- Easily repositioned when required
- Deployed and site ready within 3 minutes by one person

Paint Options

High quality paint finish available in our range of colours, or let us customise your cabin's exterior with your company colour-scheme.

Body & Finish

Boss Cabins are unique in the mobile welfare industry in offering their entire range of products in a full stainless steel construction. Stainless steel is 25% stronger than mild steel which greatly reduces the chances of impact damage, a common problem on sites where large machinery is in operation.

When specified in stainless steel your cabin will come supplied with a 25 year anti-corrosion guarantee ensuring your cabin stays in prime condition, looking younger for longer, helping to maximize your return on investment and achieve the best residual value when its time to sell.

The entire range of products manufactured by Boss Cabins whether produced in stainless or mild steel following fabrication are shotblast, prepped with a 'Chip Guard' coating to at risk areas, such as the roof, undercarriage, bottom rails and front face of the cabin and then painted and baked in our purpose built oven to give the unit an immaculate and robust paint finish able to withstand the rigours of the most demanding environments.

Stainless Steel — Key Benefits

- Higher strength over mild steel
- Excellent impact resistance
- Reduced maintenance costs
- Eliminates rust spots and under paint rust creep
- 25 Year Anti-corrosion guarantee
- Transferable guarantee
- Longer life expectancy than mild steel
- Improved residual value.

Comfort Space 14 Standard Features:

- Cabin:**
- HSE & VCA Compliant
 - Certified with ball hitch or pin and eye coupling
 - Road towable
 - Site delivery to deployment in under 3 minutes — (1 Person)
 - High security doors and window shutters
 - Heavy duty corrugated body construction
 - Wear blocks to rear bottom rail
 - Stainless steel corner protectors
 - Low level lifting eye points
 - Chain guard protection to top rails when lifting
 - High security front flap or cowl with bear claw lock
 - External power feed point
 - Ram guards
 - Stainless steel checker plate kick strips to all thresholds

Power Generation

For any company repairs and maintenance are a significant cost in the up keep of a fleet of mobile welfare units. Due to the nature of the product units can be sited for weeks, months or even years at a time in remote or secure locations where access is restricted.

With the RedBox range of generators, inconvenience to your customers or site operatives, unit downtime and service costs are massively reduced. Even the entry level RedBox generator comes with 1000 hour service intervals as standard which are four times longer than an average generator.

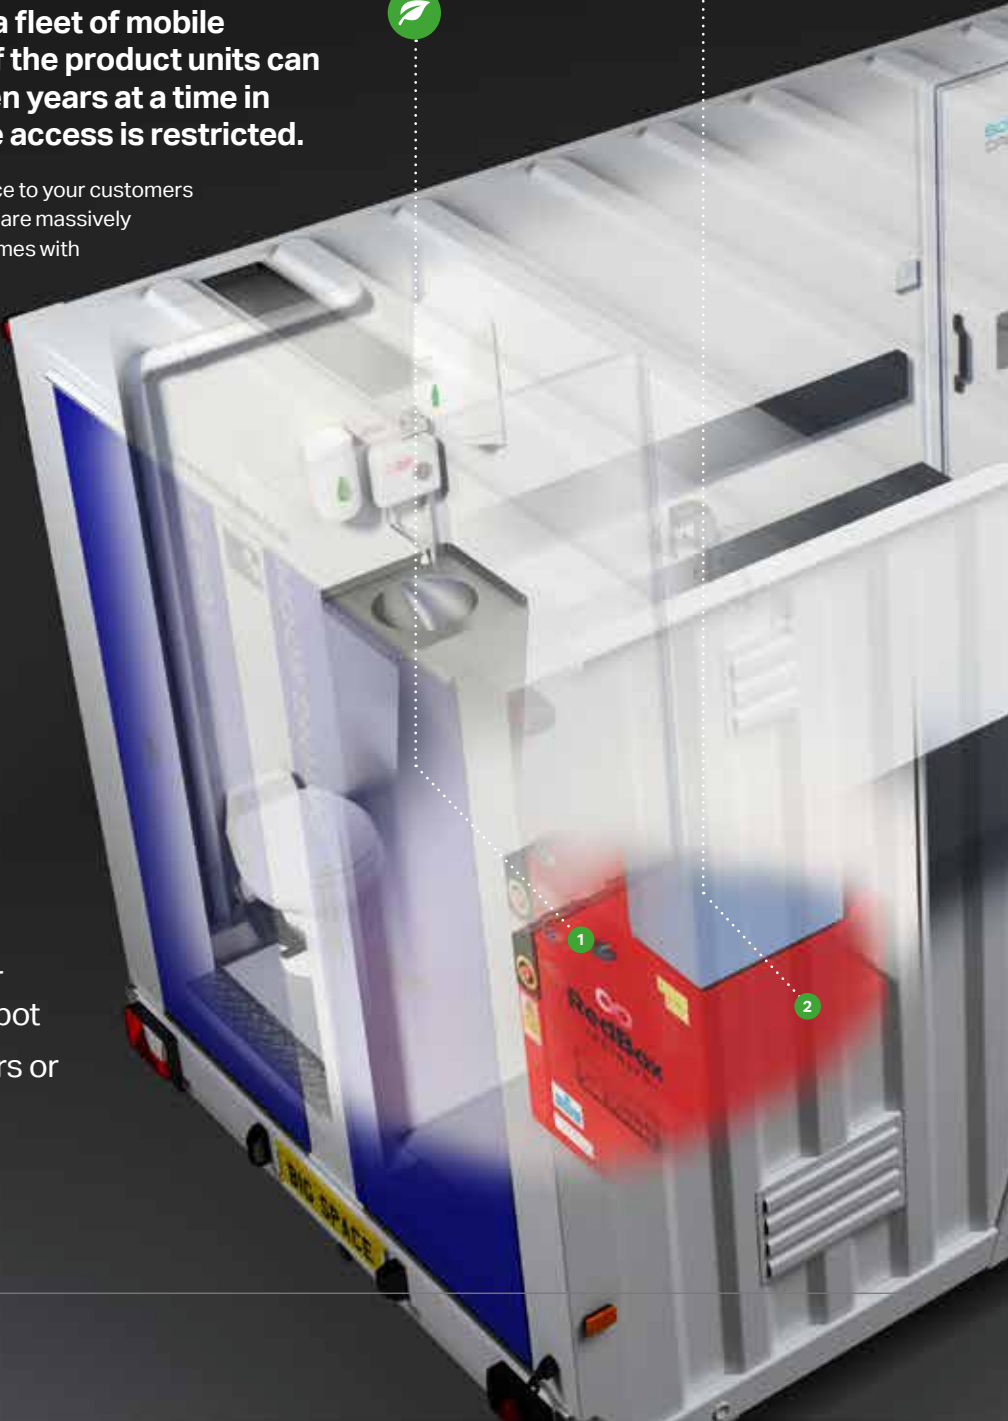

However if efficiency and cost reduction are important to your business then the patented RedBox Infinity generator with 2000 hour service intervals is the generator for you. With service intervals eight times longer than that of a standard generator the RedBox Infinity can save you thousands of pounds over the life of the unit.

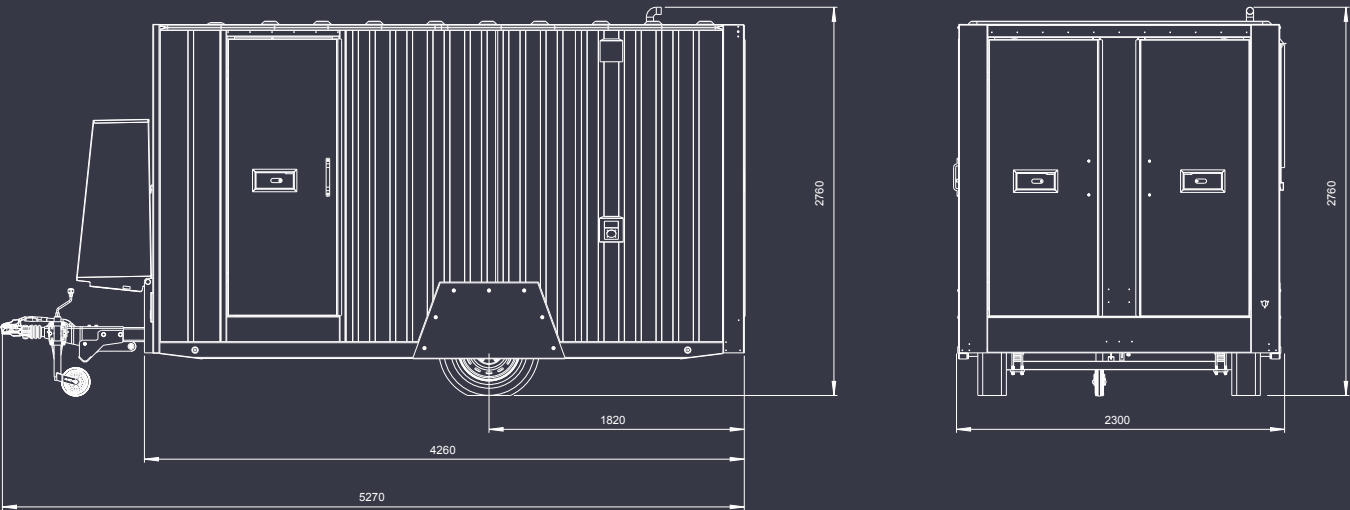

RedBox Infinity — Key Benefits:

- 2000 Hour service intervals
- Reduced service costs
- Flexibility to schedule generator services when off hired or in depot
- Minimise downtime to customers or site operatives
- Reduced risk of invalidating manufacturers warranty

- 1 Boost your environmental credentials
Reduced emissions, extended generator service intervals and reduced fuel consumption
- 2 Reduced running costs
Increased lifespan, lower overheads

Technical Data

Boss Shadow

- GPS Tracking
- Movement alerts and theft alarm
- Remote monitoring and shutdown
- Remote diagnostics and fuel level reading
- Tailored reporting
